

Botron offers many two types tape dispensers to be used with Botron conductive and anti-static tapes. The B1602 for tape up to 2" wide or 2 rolls 1" wide with a 3" core. The B1603 holds up to 3" wide or 3 rolls 1" wide. Each roller is 1" wide so you can also use any size that will fit on each single roller (ie) ¼" – 1". Both units are weighted with a static dissipative rubber base for stability. Using out tape dispensers will reduce the chances of generating a static charge. Never use standard tapes at an ESD safe workstation. **Disclaimer.** All statements of technical information are believed to be true and are based upon tests we believe to be reliable. The proper use and application for this product must be the responsibility of the user. The statements herein shall have no force or effect.
