

Botron High Quality Type O Energy-absorbing 3 layer Disk Drive rolls. 3/8" thickness provides excellent cushioning and a static safe station. Can be used on benches, cart, tray or shelves. The Type O product is designed to protect parts susceptible to physical shock and damage like disk drives. It is a soft vinyl foam, pliable 31yr. Material that can be used in many areas of the manufacturing plant. It can be cut with a razor knife or even die cut. It meets ANSI/ESD and EIA-625 ESD standards. **Disclaimer.** All statements of technical information are believed to be true and are based upon tests we believe to be reliable. The proper use and application for this product must be the responsibility of the user. The statements herein shall have no force or effect.

B54260

- Only sold in rolls
- Meets S20.20
- Can be used on carts, tray and benches
- As a general rule, rolls should be grounded every 10'
- This will ensure a good path to ground
- Hardware not included
