

Cost-effective, fast and Chamber Vacuum Sealer that in less than two cubic feet of space outperforms other sealers in its class!

Botron BAVC20 (no gas) and BAVCG20 (with gas flush)

The BAVC provides the best of both worlds... compact, design with outstanding gas-flush or not vacuum packaging performance. Our reputation for making durable, easy to use vacuum sealers continues in the BAVC's heavy-duty design and push button activation. IT'S THAT EASY! The BAVC's performance will increase your productivity and it's low price will surprise you.

The heavy-duty BAVC's is Clean Room compatible, designed with a low noise, non particle-generating compressed air-driven ejector pump that is 100% maintenance free, to assure you of a clean, contaminant-free packaging environment. It's strong 1/4" wide sealing element will quickly and easily give you a consistent leak-proof seal for your moisture barrier bags; perfect for Dry Packaging applications on trays, tape reeled products, tubes and other shipping containers. The unique Stainless Steel Retractable Nozzle design reduces the operator-bag manipulation during the vacuum cycle and maintains a high suction flow.

The BAVC's comes with advanced safety features for your protection. It also comes with spare replacement parts. All connections are supplied for a quick and easy setup. Also was made to provide you with years of dependable service.

#### FEATURES

- Clean Room compatible
- Stainless Steel chamber
- Emergency shut off switch
- Chamber size: 22"x22"x4"
- Spare parts, fittings, air and gas tubing included
- Adjustable Vacuum settings
- Vacuum Gauge
- Works with all popular moisture barrier bag materials
- One year limited warranty

#### SPECIFICATIONS

- Seal length: 20", 1/4" seal width
- Chamber size: 22"x22"x4"
- Vacuum flow: 18 CFM • Max. vacuum pressure: 28.5inHg
- Air requirements: 18 CFM @90PSI
- Power requirements: 120 Volts AC, 6Amps (during heat cycle only)
- Approximate weight: 118Lbs.
- unit size 28"x24"x9.5"
